

Dear Ladies and Gentlemen,

With this edition of the SHL Newsletter, we are providing you with all the latest news, plus the facts and figures that are relevant to the business sector we share with you.

Thanks for your interest!

SHL's product portfolio is expanding to include a new process: metal-sawing!

This process has been specifically designed to meet the requirements of the mold-casting industry. Complete your processes and increase productivity by taking advantage of SHL's experience and know-how!

Increased performance can be achieved through further development of your processes. That's why we're adding metal-sawing to our already broad range of applications. Milling, sawing and belt-grinding can all be connected into one SHL robotic system.

Please contact us for further information. We are here to serve you!

Please don't hesitate to contact us.
